

# Project Poster

The poster session will be on Thursday August 02 2018, from 15:00–17:00 in TASC1 9204. You will have to have it ready before this for printing.

The poster you produce should contain roughly the information that you would try to convey if you were doing a short presentation about your project: what was the goal, how did you do it, how does it work, overview of interesting features, screenshots, etc.

There will be poster boards (to hang your poster) and tables available that day. If you'd like to bring a laptop for demonstrations, you can.

See also [ProjectPosterNotes](#). Please have a look at these before starting your poster.

## Submitting

Your poster will be marked during the poster session and does not have to be submitted.
