

Project Overview

A project overview must be completed *individually* by each group member. In this, you should give an overview of the design and implementation of the project. Also, give a broad indication of what parts of the project were completed by which group members. You can also give a summary of future work that could be done on your project.

You should include a survey of current alternatives to your system, including both commercial and free options (as appropriate). Highlight the similarities and differences between these solutions and yours.

The overview should be a few pages in length, submitted as a PDF file.

This is due the day after the final implementation, Tuesday August 07 2018.

Submitting

Submit it to [Project Overview](#).
